

Cellona® plaster bandage features an extra rich texture for maximum moldability, high strength, no-drip consistency, and full, even plaster impregnation. The green core is perforated to allow water to circulate into the interior of the bandage, eliminating troublesome dry spots.

Cellacast® Cast Tape is available in three varieties—Xtra (rigid fiberglass), Soft (flexible fiberglass) and Active (polyester). Conformable and lightweight, Cellacast® is easy to unroll, requires no special gloves and is available in creme (pictured above) and colors.
